Trans. of Voprosy Rudnoi Geofiziki (USSR) 1957, v. 1,
p. 62-68.

DESCRIPTORS: *Well logging, *Geophysical prospect-
ing, *Rock, Density.

A new method of geophysical exploration in boreholes
is briefly described, electric logging to determine the
density of rock, initially suggested by M. M. Sokolov
and developed under his guidance by the author with the
assistance of N. I. Karabanov. The method is based
on the existence of a definite relationship between the
scattering of gamma radiation and the density of rocks.
